

SJVAPCD's Grants & Incentives: Charge Up!

Purpose of the Program

Provides incentives for the purchase of new, eligible Level 2 and 3 electric vehicle (EV) chargers to promote clean air alternative-fuel technologies and the use of low- or zero-emission vehicles.

Site Requirements

- 24/7 public accessibility if the project includes a Level 3 EV Charger.
- Must be owned by applicant or the applicant must provide written permission by the property owner.
- At least one specified and clearly marked parking stall per EV charger.
- Clearly marked parking stalls with all necessary signage as defined in the Federal Highway Admins. Manual on Uniform Traffic Control Devices 2009 edition.
- Safe and easy accessibility. Proper lighting, etc.
- Proper directional signage alerting the public to the charger.
- Cannot be residence.
- Be a location that is publicly accessible, a place of employment meant for workplace charging, or a combination of both.
- Single-family residences are not eligible, but property owners of multi-unit dwellings are eligible to apply.

Funding

Charger Type	*Maximum Amount Per Unit	Minimum Cost Share
Level 2 Single Port	\$5,000	None
Level 2 Dual Port	\$6,000	None
Level 3/DC Fast Charger	\$25,000	30% of total cost
FUNDING CAP:	\$50,000 annually per applicant/site	

**Actual reimbursement of funds to applicant may be reduced depending on final eligible invoiced costs.*

General Information and Program Requirements

- First come, first serve.
- Must obtain voucher before purchasing any new EV chargers. **Not a rebate!**
- Funds provided for charger, installation costs, and necessary signage.
- SJVAPCD may conduct site visit.
- Siting analysis tool that helps choose optimal location: www.valleyair.org/chargeup
- Cannot be co-funded through other SJVAPCD incentive programs.
