SJCOG Congested Corridor Plan
I-205, I-5, SR 120, and SR 99

September 10, 2019
What is the Congested Corridor Plan?

We all experience the challenges of getting around San Joaquin along the I-205, I-5, State Route 120 and State Route 99 Corridor.

The goal of this Congested Corridor Plan is to reduce traffic congestion and increase travel choices through a balanced set of transportation, environmental, and community access improvements.
What is SB 1?

Senate Bill 1 (SB 1), the Road Repair and Accountability Act of 2017, is a $54 billion transportation investment to rebuild California.

SB 1 will fix roads, freeways and bridges in communities across California and puts more dollars toward transit and safety. These funds are split equally between state and local investments.
The San Joaquin Council of Governments (SJCOG) and Caltrans have partnered to prepare the I-205, I-5, State Route 120 and State Route 99 Congested Corridor Plan.

This plan is required to compete for funding from the California Transportation Commission’s SB 1 Solutions for Congested Corridors Program.
Other Funding Sources to Implement the Congested Corridor Plan

- SB 1 – Trade Corridor Enhancement Program (TCEP)
- SB 1 – Local Partnership Program (LPP)
- Active Transportation Program (ATP)
- Transit and Intercity Rail Capital Program
- Federal Competitive Funding
- Measure K Local Transportation Sales Tax
Goals of the Congested Corridor Plan

- Reduce Congestion / Travel Time for all modes
- Increase Carpooling, Transit, Rail, and Active Transportation (Bicycling and Walking) Options
- Move people more efficiently through High Occupancy Vehicle (HOV or Carpooling), Transit and Rail Options
- Improve Safety
- Improves Accessibility
- Create New Jobs
- Improve Air Quality
SJCOG RTP/SCS

- SJCOG is required to adopt a long range Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS) every 4 years

- This ambitious Plan focuses on how land-use and transportation can work together to help the region achieve lower greenhouse gas emissions, improve air quality, improve economic opportunity, and reduce impacts on vital farm and natural lands.

- The Congested Corridor Plan will help implement the 2018 RTP/SCS and inform the next 2022 RTP/SCS
Multi-Modal Projects
Summary of Projects by Sub-Corridor

- 53 Key Projects in the I-205, I-5, SR 120 and SR 99 Congested Corridor Plan
  - 16 Multi-Modal Projects in the I-205 Sub-Corridor
  - 14 Multi-Modal Projects in the I-5 Sub-Corridor
  - 15 Multi-Modal Projects in the SR 120 Sub-Corridor
  - 8 Multi-Modal Projects in the SR 99 Sub-Corridor
KEY CORRIDOR PROJECTS IN DEVELOPMENT NOW
SR 120/SR 99 Connector Project Status Update

Project purpose to relieve traffic congestion and improve operations of SR 99 with the SR 120 and Austin Road interchanges.

- **Phase 1A** – Funding secured and on schedule!
  - September 2019: Environmental Clearance Complete
  - Summer 2021: Complete Right of Way Certification
  - Spring 2022: Start Construction

- **Phase 1B** – Timing Dependent on Securing Funding

- **Phase 1C** – Will occur when planned development happens around Austin Road Interchange
SR 120/SR 99 Connector Phase 1A

**LEGEND**
- EXISTING ROADWAY
- REMOVE ROADWAY
- PHASE 1A: EASTBOUND 120 TO SOUTHBOUND 99 WIDENING
- PHASE 1B: NORTHBOUND 99 TO WESTBOUND 120 WIDENING
- PHASE 1C: BRAIDED RAMP INTERCHANGE
- NEW OR WIDEN BRIDGE
- UPRR
- CLOSE RAMP

**SR99/120 INTERCHANGE CONNECTOR**

**PHASE 1A**

- RELOCATE EASTBOUND 120 TO SOUTHBOUND 99 CONNECTOR AND WIDEN TO TWO LANES
- CLOSE NORTHBOUND ON-RAMP AND SOUTHBOUND OFF-RAMP
- REPLACE BRIDGE OVER SR 99, MOFFAT BLVD, AND UPRR
- NEW MOFFAT BLVD TO AUSTIN RD LOCAL CONNECTOR
SR 120/SR 99 Connector Phase 1B

SR 120 INSIDE WIDENING
WIDEN WESTBOUND BRIDGES OVER MOFFAT BLVD AND VAN RYN AVE

TO STOCKTON
SR 99
NEW EASTBOUND 120 TO NORTHBOUND 99 CONNECTOR BRIDGE
RELOCATE NORTHBOUND 99 TO WESTBOUND 120 CONNECTOR AND WIDEN TO TWO LANES
RAMP REMAIN CLOSED

LEGEND
EXISTING ROADWAY
REMOVE ROADWAY
PHASE 1A: EASTBOUND 120 TO SOUTHBOUND 99 WIDENING
PHASE 1B: NORTHBOUND 99 TO WESTBOUND 120 WIDENING
PHASE 1C: BRAIDED RAMP INTERCHANGE
NEW OR WIDEN BRIDGE
UPPER
CLOSE RAMP

SR99/120 INTERCHANGE CONNECTOR
PHASE 1B
SR 120/SR 99 Connector Phase 1C

Legend:
- Existing Roadway
- Remove Roadway
- Phase 1A: Eastbound 120 to Southbound 99 Widening
- Phase 1B: Northbound 99 to Westbound 120 Widening
- Phase 1C: Braided Ramp Interchange
- New or Widen Bridge
- UPRR

Actions:
- Extend inside widening
- Widen eastbound bridges over Moffat Blvd and Van Ryn Ave
- Restore northbound on-ramp and southbound off-ramp
- TO I-5

Locations:
- Moffat Blvd
- Van Ryn Ave
- Frontage Rd
- TO MODESTO
- TO STOCKTON

Interchange:
- SR99/120 Interchange Connector

Corridor Plan:
- SJCOG Congested Corridor Plan
ACE Valley Rail Project

- ACE service being expanded to Ceres, Merced, and Sacramento
- $1 billion in improvements underway
- New Stations in Ripon, Downtown Manteca, and North Lathrop
- Other improvements to allow a 5th and 6th train over the Altamont Pass
- Saturday Service from Stockton to San Jose started September 7th
Valley Link Project

- Proposed rail service connecting ACE to BART on I-580, through Altamont Pass, and downtown Tracy
I-205 Cross Sections

HOV or Express Lanes Only

SJCOG CONGESTED CORRIDOR PROJECT
I-205 Cross Sections

HOV or Express Lanes With Bus Lane

SJCOG CONGESTED CORRIDOR PROJECT

HOV or Express Lanes with Rail
Integrated Corridor Management Plan

- Caltrans working with SJCOG and local agencies to look at strategies to improve operations on highway system and local roads
  - Coordinated planning and operations
  - Real-time monitoring of transportation conditions
  - Intelligent Transportation Systems infrastructure
  - Accurate, real-time traveler information for all modes
  - Alternate routes to get travelers safely and efficiently back to the highway system during incidents

CONGESTED CORRIDOR PLAN ANALYSIS AND RESULTS
Improving Travel Choices

- Reduce Congestion / Travel Time by providing multi-modal choices for travel within San Joaquin County and also to and from the San Francisco Bay Area
- Increase Percent of People using Carpooling, Transit, Rail, and Active Transportation Options
- Increase Person Throughput via transit and rail options
- Reduce Vehicle Miles Traveled by Single Occupancy Vehicles (SOV)
Improving Safety and Accessibility

- Improve Safety by constructing improvements at current locations with recurring congestion and where collisions occur.
- Implement Multi-Modal and Complete Streets projects for transit, rail, bicycle and pedestrian trips.
- Improve Accessibility for all modes of travel via Park and Ride Lots, Bus Transit, and Passenger Rail Improvements.
Economic Growth and Improved Air Quality

- SJCOG’S RTP/SCS projects that by 2045 San Joaquin County will be home to nearly 1,100,000 people
- The RTP/SCS also projects there will be 100,000 new jobs added between 2020 and 2045
- Providing multimodal options for long distance trips to the Bay Area and local career opportunities will improve air quality
Potential Benefits of These 53 Multi-Modal Projects

- Reduce Vehicle Miles Traveled per Capita (population) by more than 12%
- Reduce Single Occupant Mode Share by 5%
- Increase percent of people that Carpool, use Transit, Rail, or Bike and Pedestrian Mode by more than 50%
- Increase person throughput between the Central Valley and the San Francisco Bay Area by more than 25%
Potential Benefits of These 53 Multi-Modal Projects

- Reduce travel time between the Stanislaus River and Altamont Pass by about 30% for HOV and transit trips
- Reduce travel time between the Central Valley and the San Francisco Bay Area by about 50% for commuter rail passengers via ACE or Valley Link
- Improved air quality by decreasing emissions from Single Occupant Vehicles
