

San Joaquin One Voice® Project Request

Lower Sacramento Road Corridor 2022

Statement of Purpose:

The City of Stockton is seeking \$35 million to complete the widening of the Lower Sacramento Road Corridor, an important regional arterial. The project will widen approximately 1.8 miles of the Lower Sacramento Road Corridor from the existing two-lanes to four lanes. The project limits include Lower Sacramento Road from Royal Oaks Drive to Pixley Slough. Other improvements along this corridor include the replacement of bridges located at Bear Creek and Pixley Slough. These improvements will tie into the new Lower Sacramento Road Grade Separation Underpass project and San Joaquin County's Lower Sacramento Road Widening project (recently completed). These improvements will upgrade the roadway design, capacity and operations to achieve vehicular safety as well as reduce congestion issues. The project will provide an important link from expanding housing areas in North Stockton and Lodi to Stockton's economic core. The project will also include pedestrian and bicycle facilities to encourage alternate modes of transportation with a goal of improving air quality.

Project Summary:

The limits of the Lower Sacramento Corridor project include approximately 1.8 miles of Lower Sacramento Road from Royal Oaks Drive to Pixley Slough (Exhibit A). Currently, Lower Sacramento Road is a two-lane arterial road with no median. The proposed project will widen Lower Sacramento Road to four lanes to meet the vehicular demands that Lower Sacramento Road currently experiences as well as for future projected vehicular demands. The project will include the replacement of the two-lane bridges spanning Bear Creek and Pixley Slough which were constructed in 1963 and 1940, respectively. The proposed project will eliminate vehicle delays, reduce vehicle emissions, and eliminate the remaining bottle necks between Stockton and Lodi along Lower Sacramento Road. The project will also encourage alternate modes of transportation with the incorporation of sidewalks and bicycle lanes.
