

San Joaquin One Voice® Project Request

State Route 99/120 interchange Project Phase B

Project Summary:

State Route 120 provides a critical connection for the movement of people and goods in and out of the San Joaquin Valley. However, the State Route 99/120 freeway-to-freeway interchange is subject to significant congestion, delays, and high accident rates. This project will expand and reconstruct the existing State Route 99/120 interchange to relieve traffic congestion and improve operations of SR 99 along with the SR-120 and Austin Road interchanges. This area continues to be of great concern to Manteca leaders and residents due to the excessive number of automobile collisions, injuries, and deaths within this six-mile stretch of highway. In addition to the accident rate, the delays associated with this interchange are a significant impediment to the economic growth in the region. Total project cost is \$142 million.
